Application/Control Number: 10/718,841

Art Unit: 1746

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Page 2

2. Claims 1-3 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over UK'330 (U. K. 2 319 330) or UK'095 (U.K. 2 326 095). In view of Japan'049 Japan 11-290049).

Re claim 1, note that UK'330 and UK'095 is cited disclosing a spray manifold (9 in UK'095 and 14 in UK'330), pump (as at 10 in UK'330 and as at 100 in UK'095) and a controller (22 in UK'220, see page 9, 6-11 and see page 15, last line in UK095) that differs from the claims only in the recitation of the swirling spray. Japan'049 is cited disclosing the spray as claimed. It therefore would have been obvious to one having ordinary skill in the art to modify the of arrangement of either UK'330 or UK'095, to be as taught by Japan'049, for the purpose of ensuring a thorough application of fluid. Re claim 2, to employ one disinfectant over another is deemed an obvious matter of design and substitution of equivalents.

3. Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the either UK'330 or UK'0895 in view of Veith. Claims 4-6 define over that applied prior art only in the recitation of the filter, and one-way valve. Veith (see fig. 8) is cited disclosing the filter and filter in a wash device. It therefore would have been obvious to one having ordinary skill in the art to modify the device of either UK'095 or UK'330, for the purpose

Application/Control Number: 10/718,841

Art Unit: 1746

of regulating the fluid flow thereby ensuring proper exposure of the cleaning fluid of the system.

Page 3

- 4. Applicant's arguments filed September 27, 2006 have been fully considered but they are not persuasive. It has been noted that applicant argues the cabinet employing a defrost cycle, and misting poultry and meats and the system for treating vegetables being different that for poultry and meats. However, it should be noted that for consideration of the same it suggested that the claims be amended to recite the correlation of the spray system and the article being treated in that the arguments are more limiting than the claims.
- 5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Application/Control Number: 10/718,841

Art Unit: 1746

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to FRANKIE L. STINSON whose telephone number is (571) 272-1308. The examiner can normally be reached on M-F from 5:30 am to 2:00 pm and some Saturdays from approximately 5:30 am to 11:30 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr, can be reached on (571) 272-1700. The fax phone number for the organization where this application or proceeding is assigned is 571-272-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
